

Installation of Root Center certificate on the system

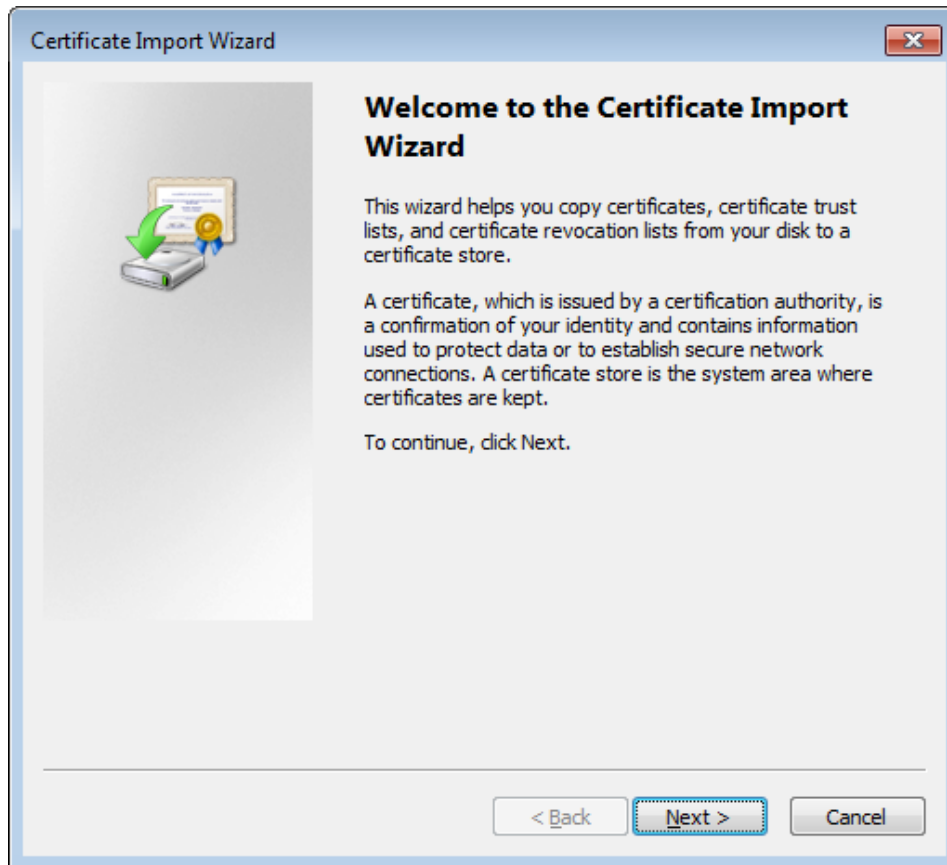

After the certificate is downloaded, make double click on it with left button of mouse to start it. Then the installation of programs in the package will start in order. Observe the following steps when installing the programs.

1. In the first open window click **Install Certificate** button.

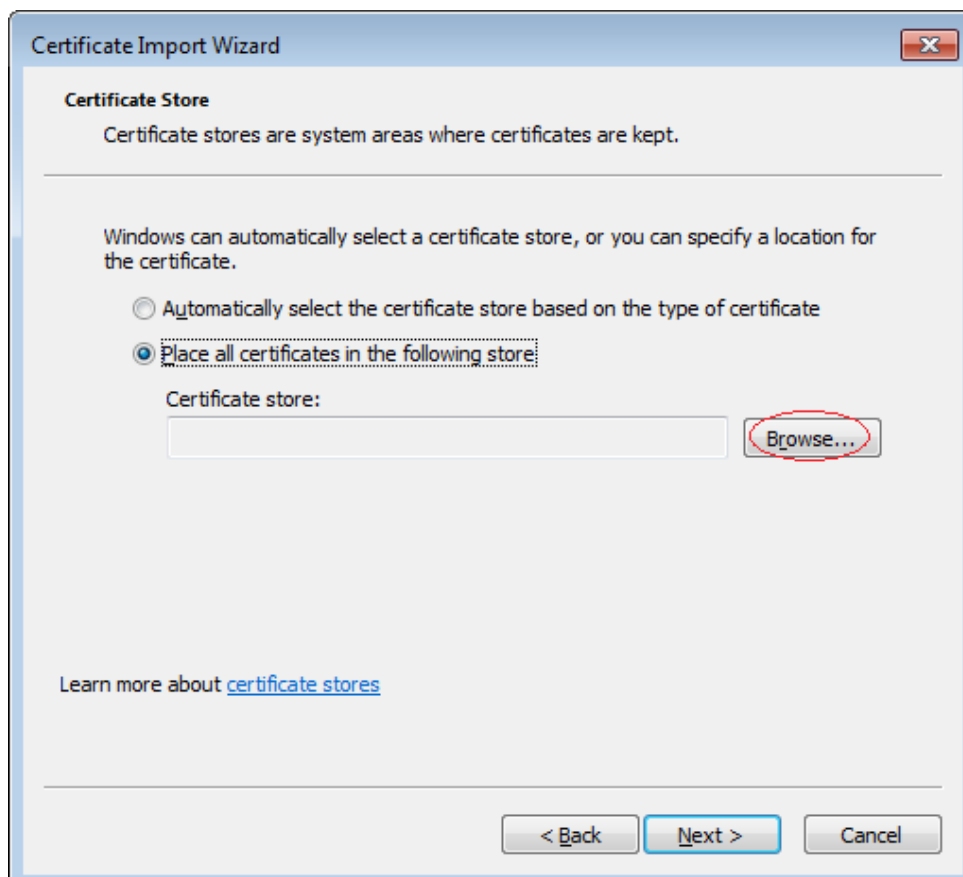

Picture 1.

2. In the next window, click **Next** button.

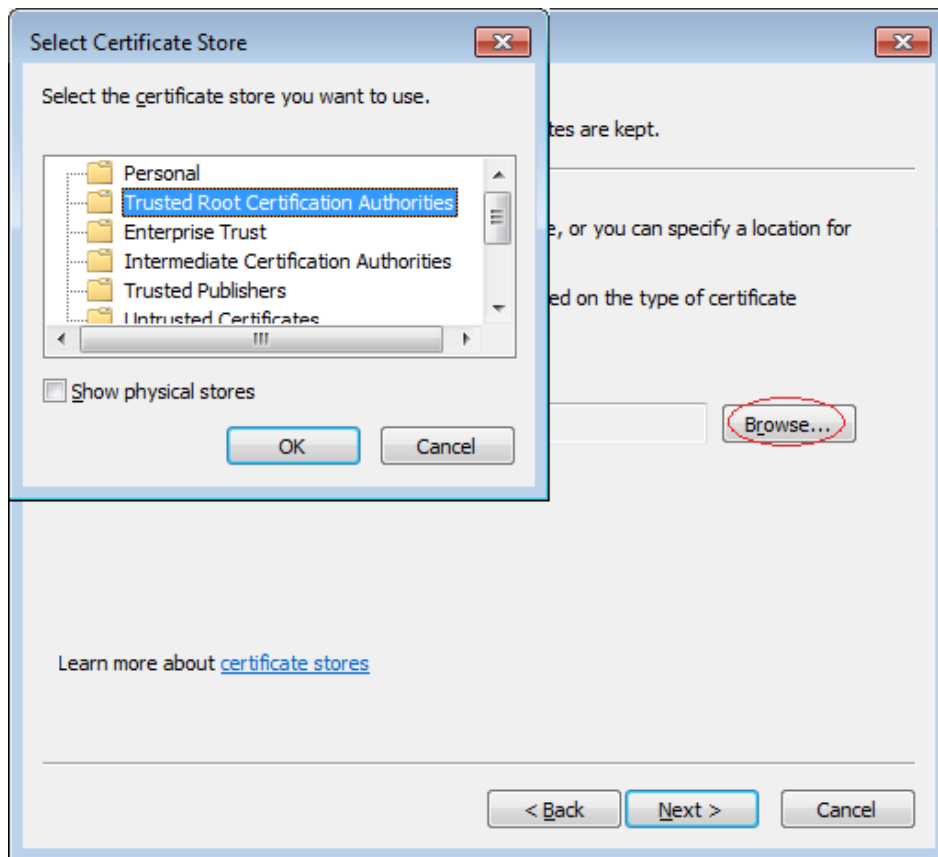

Picture 2.

3. Choose **Browse** button in the next window and pass to certificate store.

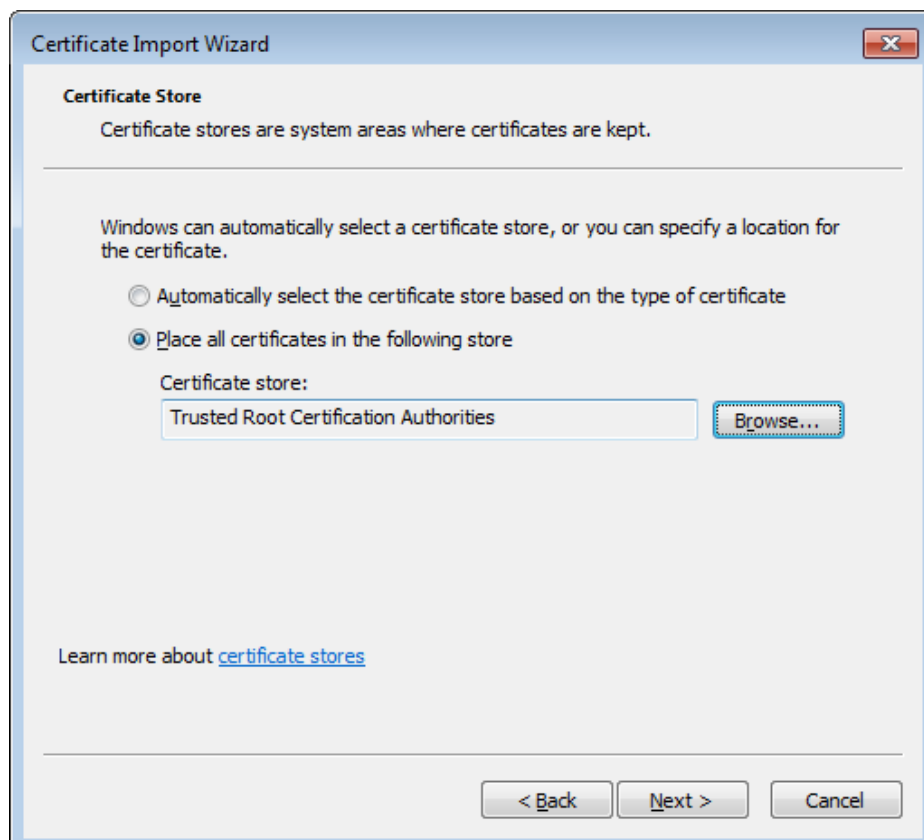

Picture 3.

4. In this section, choose **Trusted Root Certification Authorities** and click **OK** button.

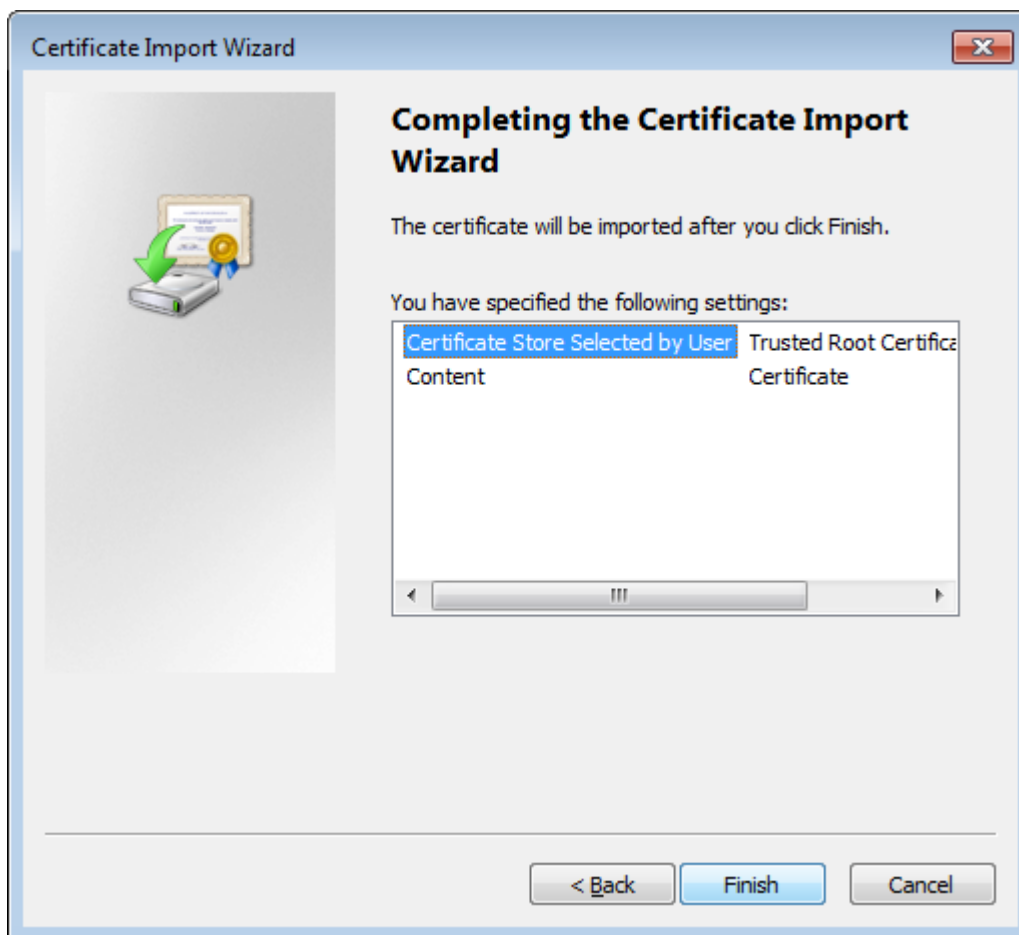

Picture 4.

5. Then click **Next** button to include the certificate into the store.

Picture 5.

6. To complete the process, click **Finish** button.
